The Way of Peace

While Communists in Russia and in Canada cry "Peace", they obviously want only one kind of peace. That is the kind that leaves the world in the arms of Russian slavery, with the attendant evils of firing squads and Siberian exile.

squatas and suberian exite.

The Russian government, represented in our cartoon by the Bear, may be ready to sit down at the conference table and he may not. Certainly, he could, if he wished, quickly-ban the threat of war from the scene. But so far he has indicated only a desire to gobble up all the peace-loving nations, and in fact wipe out the hopes of peace.

Grace and Justice

Almost from the earliest days of Christianity the symbol of faith has been the Christ on the Cross. Some branches of the faith have this picture vividly portrayed in small and large crucifixes. But to all who hold the name of Jesus dear to their hearts, He represents the ultimate of sacrifice.

How could a righteous God be just and merciful to sinful man? Not by ignoring sin, because that would not be just. Not by meting out the penalty of a lost eternity to every sinner, because there would then be no chance of reconciliation, nor opportunity for worship, no sweet communion with the

for worship, no sweet communion with the Creator.

But God, as one member of the Trinity, was just in exacting the penalty for sin and merciful in that His Son, Jesus Christ, 'bow the penalty for our sins on the tree.' The soul that would avail himself of both the grace and justice of Almighty God must accept the Sacritice of Jesus Christ, second swatton of himself.

Then the third person, the Holy Spirit, will unlite the pentitent sinner to his God in

will unite the penitent sinner to his God in the joy of day-to-day worship and fellowship. Such is the miracle of man's salvation.

During this short period of 28 months the new prime minister has enhanced both his own and his government's record by an imposing list of achievements.

Canada has reached adult nationhood. Newfoundland has become the tenth province, thus extending the eastern limits of our country to the farthest reaches set by the Fathers of Confederation. The Canadian Parliament now has power over the BNA act, and the Supreme Court of Canada is now the final Court of Appeal in all Canadian court of Appeal co

Our country has played an active part in the organization of the United Nations and was first to set up a special military force to back up the UN in a military way. A \$5,000,000,000 defence budget in three years will strengthen us in case of attack.

Canada is now the largest trading nation in proportion to its population. At the same time thousands of new immigrants are coming here steadily to take their place with older Canadians. High levels of employment and high farm and labor incomes are the and high farm and labor incomes are the order of the day. Except for the U.S.A., we have the highest standard of living in the

world.
Advances in social security with higher old-age pensions, a new \$170 million National Health program, increased family allowances and completion of the biggest housing construction program of history under the National Housing Act make Canada a better place in which to live.

No wonder a recent Gallup Popular Opinion poll showed the majority of Canadians strongly in favor of the prime minister and his party. Support of the Liberal party by the people of Canada is undiminished.

A Lesson In Socialism

By T. W. PUE

Some time ago I decried the system of keeping school students ignorant of their marks in school. I pointed out this was a mark of the trend towards the socialist state so that no man or woman can rise above his fellows. Every students' mentality is to be kept in rigid check regardless of the natural desire of boys and girls and men and women

to excel in some section of studies or sport.

Apparently, down in Yonkers, New York, the teachers are old-fashloned and actually and boldly

tell their students what marks they make in their examinations Not only that, but one teacher has the courage to use this system to teach the fallacy of communism!

communism!

Here is what he says:

As a teacher in the public schools, I find that the socialist-communist idea of taking "from each according to his ability," and giving "to each according to his ability," his need" is now generally ac-

T. W. PUE T. W. PUE cepted without question by most pupils. In an effort to explain the fallacy in this theory, I sometimes try this approach with my

When one of the brighter or harder-working pupils makes a grade of 95 on a test, I suggest that I take away 20 points and give them to a student who has made only 55 points on his test. Thus each would contribute according to his ability and

each would contribute according to his ability and — since both would have a passing mark — each would receive according to his need. After I have juggled the grades of all the other pupils in this fashion, the result is usually a "common ownership" grade of between 75 and 80 — the minimum needed for passing, or for survival. Then I speculate with the pupils as to the probable results if I actually used the socialistic theory for

grading papers.

First, the highly productive pupils — and they First, the highly productive pupils — and they are always a minority in school as well as in life — would soon lose all incentive for producing. Why strive to make a high grade if part of it is taken from you by "authority" and given to someone

ease?
Second, the less productive pupils — a majority in school as elsewhere — would, for a time, be relieved of the necessity to study or to produce. This system would continue until the high producers had sunk — or had been driven down — to the level of the lower producers. At that point, in order for anyone to survive, the "authority" would have no alternative but to begin a system of compelsory labor and punishments against even the low producers.

the low producers.

Finally I return the discussion to the ideas of freedom and enterprise — the market economy — where each person has freedom of choice, and is responsible for his own decisions and welfare. responsible for mis own decisions and wetrare. Gratifyingly enough, most of my pupils then understand what I mean when I explain that socialism—even in a democracy—will eventually result in a living-death for all except the "authorities" and a few of their favorite lackeys.

Wool and Wheat

Wool and Wheat
The price of wool on world markets has risen
most dramatically during the past year. Raw wool

CROSSFIELD - Jim Baxter attended a meeting of the Sports Club on Saturday night, April 21 in the Community hall, and upon going home found that his car had been stolen from its parking spot under the big light by the hall. In his haste Mr. Baxter had left the keys (and a fresh tank of gas). Const. Mansell went to work on the job and police located the missing car in Penhold, abandoned after the gas gave out.

Many Have TB Without Knowing It

It has been found that many re nes been found that many people have at some time in their lives suffered from tuberculosis without suspecting it. Their re-covery was due to favorable cir-cumstances or to otherwise good health, but those cases could so easily have developed into serious easily have developed into serious proportions. The only safeguard against tuberculosis striking and gaining a hold is to have regular chest X-rays, whereby the disease may be detected and treatment started in its earliest stages.

Dental Iroubles

Dental disease is a problem that
affects 98 per cent of our population. It includes children as young
as three years of age. Regular visits to a dentist from early childhood might have saved a great
deal of trouble and expense for
most of the people who have lost
teeth and suffered pain through
prolonged dental neglect.

RESIDENTS WANT TO JOIN CALGARY HOSPITAL DISTRICT

BEISEKER. — Residents of township 28, in ranges 24, 25 and 26 will make application to have this area added to the Calgary Municipal Hospital District.

The territory lies surrounding and east of the village of Beiseker. General feeling of the meeting was that this district's interests was that this district's interests could best be served if it was attached to the Calgary District as most of the people go to Cal-gary hospitals and doctors at the present time for medical atten-

gary hospitals and doctors at the present time for medical attention.

A petition will be circulated among residents of the area by a committee. W. D. MacDonald and John Leiske were nominated for range 24; Carl E. Schmaltz and Art Berreth for range 25; Ed Schwartzenberger and Joseph Hagel for range 26.

WHERE DOES THE MONEY GO ?

At times most of us have looked at purse, wallet or bank-book, and wondered: "Where does the money go?" You may have wondered, too, where does see money go—the money we receive for gasoline, fuel oil, lubricants and other products we tell. Well, last year each dollar we received went this way:

CRUDE Oil and the other raw materials we bought took half of each dollar.

OPERATING AND ADMINISTRATIVE expenses took more than 25 cents. This was the cost of searching for and producing runde oil, and of manufacturing and marketing the hundreds of products we supplied for thousands of uses. Throughout the year bigh quality products were made available where and when you needed them.

9.13 cents

TRANSPORTATION of products from our refineries to mar-keting points took the next big bite of the dollar. Products moved over wide areas to serve every community in Canada.

				-	7.64	cents
_	-	-	_	-		

TAXES to provincial and federal governments took 7.64 cents. And this did not include gasoline tax which—depending on where you live—took from 22 to 33 cents out of every dollar you spen for standard grade gasoline.

TO REPLACE worn out equipment and to make sure that we can supply your needs in the future took 3.39 cents.

DIVIDENDS paid to shareholders for use of plants and equipment amounted to 3.45 cents.
